Health Equity Strategies and Initiatives

Loren Anthes
Vice Chair, Board of Directors
Better Health Partnership
Health Equity Strategies and Initiatives

Learning Objectives

1. Gain knowledge of tools, resources, and actions aligned with CMS’s strategic pillar to advance health equity to help them eliminate disparities and advance equity in their local community or service area.

2. Describe unique payer programs and strategies being implemented to address health disparities and promote equity.

3. Identify ways that community engagement is integrated into payer health equity strategies for better alignment with needs and achievement of outcomes.
CMS Office of Minority Health
Framework for Health Equity

Agenda

• Health Equity Key Terms and Concepts

• CMS Framework for Health Equity & CMS Framework for Advancing Health Care in Rural, Tribal, and Geographically Isolated Communities

• Tools & Resources

• Questions to Run On:
  — What actions would you like CMS to take to help you provide better Behavioral Health Services?
  — What is one critical barrier or opportunity to raise to CMS to improve care you provide/pay for among underserved, underheard communities?
Health Equity
Key Terms & Concepts
Equity Versus Equality

- **Health equity**: the attainment of the highest level of health for all people
- While equality offers the same opportunities, equity ensures fairness

Source: rwjf.org/en/library/infographics/visualizing-health-equity.html#/download
Health Equity at CMS

**Health equity** means the attainment of the highest level of health for all people, where everyone has a fair and just opportunity to attain their optimal health regardless of race, ethnicity, disability, sexual orientation, gender identity, socioeconomic status, geography, preferred language, or other factors that affect access to care and health outcomes.

CMS is working to advance health equity by designing, implementing, and operationalizing policies and programs that support health for all the people served by our programs, eliminating avoidable differences in health outcomes experienced by people who are disadvantaged or underserved, and providing the care and support that our enrollees need to thrive.

Priority Populations Across the U.S.

CMS OMH works with local and federal partners to reduce health disparities and improve the health of all minority populations, including:

• Racial and ethnic minority communities
• People with limited English proficiency
• Lesbian, gay, bisexual, transgender, queer and intersex (LGBTQI+) people
• People with disabilities
• People who live in rural and frontier communities, Tribal nations, and geographically isolated areas
• People otherwise affected by persistent poverty or inequality
Social Determinants of Health (SDOH)

• The U.S. Department of Health and Human Services (HHS) defines SDOH as the conditions in the environments where people are born, live, learn, work, play, worship, and age that affect a wide range of health, functioning, and quality-of-life outcomes and risks.

• SDOH can be grouped into five categories:
  – Economic Stability
  – Education Access and Quality
  – Health Care Access and Quality
  – Neighborhood and Built Environment
  – Social and Community Context
American Indian and Alaska Native People in the U.S.

• American Indian and Alaska Native Americans have a lower life expectancy, a lower quality of life, and a higher prevalence of many chronic conditions.

• American Indian and Alaska Native people continue to die at higher rates than other Americans in many categories, including:
  — Chronic liver disease and cirrhosis
  — Diabetes
  — Unintentional injuries
  — Assault/homicide
  — Intentional self-harm/suicide
  — Chronic lower respiratory diseases

• American Indian and Alaska Native people born today have a life expectancy that is 5.5 years less than all other racial and ethnic groups in the U.S.

Note: Data on this slide reflects the priority population within the U.S. regardless of insurance status.
Lesbian, Gay, Bisexual, Transgender, Queer (LGBTQI+) People in the U.S.

- LGBTQI+ people are members of every community and include people of all races, ethnicities, ages, and socioeconomic statuses.

- LGBTQI+ people in the U.S. face health disparities linked to social discrimination, including:
  - Less access to insurance and health care services, including preventive care (such as cancer screenings)
  - Lower overall health status
  - Higher rates of smoking, alcohol, and substance abuse
  - Higher risk for mental health illnesses, such as anxiety and depression
  - Higher rates of sexually transmitted diseases, including HIV

- In addition, LGBTQI+ patients face other barriers to equitable care, such as refusals of care, delayed or substandard care, mistreatment, little or no inclusion in health outreach or education, and inappropriate restrictions or limits on visitation.

Note: Data on this slide reflects the priority population within the U.S. regardless of insurance status.

Sources:
Lesbian, Gay, Bisexual, Transgender, Queer (LGBTQI+) People in the U.S. (cont.)

- For all men, heart disease and cancer are leading causes of death. However, compared to other men, gay, bisexual, and other men who have sex with men (MSM) are additionally affected by:
  - Higher rates of HIV and other sexually transmitted infections (STIs, such as syphilis, gonorrhea, and chlamydia)
  - Higher rates of viral hepatitis including hepatitis A, B, and C
  - Tobacco and drug use
  - Depression

- Lesbian, bisexual, and transgender women are less likely to get preventive services for cancer and are more likely to be overweight or obese.

- Transgender women are more at risk for HIV and STIs, violence, and mental health issues, and are less likely to have health insurance.

Note: Data on this slide reflects the priority population within the U.S. regardless of insurance status.

Plain Language, Health Literacy, Language Access and Culturally and Linguistically Appropriate Services

• **Plain language** ([plainlanguage.gov](http://plainlanguage.gov))
  — Communication your audience can understand the first time they read or hear it.

• **Health Literacy** ([Healthy People 2030](https://www.healthypeople.gov/))
  — **Personal health literacy** is the degree to which individuals have the ability to find, understand, and use information and services to inform health-related decisions and actions for themselves and others.
  — **Organizational health literacy** is the degree to which organizations enable personal health literacy.

• **Limited English Proficiency** ([LEP.gov](http://lep.gov))
  — Individuals who do not speak English as their primary language and who have a limited ability to read, speak, write, or understand English can be limited English proficient, or "LEP."

• **Culturally & Linguistically Appropriate Services and National CLAS Standards** ([ThinkCulturalHealth.gov](http://thinkculturalhealth.gov))
  — Services that are respectful of and responsive to individual cultural health beliefs and practices, preferred languages, health literacy levels, and communication needs and employed by all members of an organization (regardless of size) at every point of contact
  — The National CLAS Standards are a set of 15 action items intended to advance health equity, improve quality, and help eliminate health care disparities by establishing a blueprint for health and health care organizations.
CMS Frameworks for Health Equity
CMS Strategic Pillars

**ADVANCE EQUITY**
Advance health equity by addressing the health disparities that underlie our health system

**EXPAND ACCESS**
Build on the Affordable Care Act and expand access to quality, affordable health coverage and care

**ENGAGE PARTNERS**
Engage our partners and the communities we serve throughout the policymaking and implementation process

**DRIVE INNOVATION**
Drive Innovation to tackle our health system challenges and promote value-based, person-centered care

**PROTECT PROGRAMS**
Protect our programs’ sustainability for future generations by serving as a responsible steward of public funds

**FOSTER EXCELLENCE**
Foster a positive and inclusive workplace and workforce, and promote excellence in all aspects of CMS’s operations
CMS Framework for Health Equity

- Operationalize health equity across all CMS programs: Medicare, Marketplace, Medicaid, and CHIP
- Is evidence-based and informed by decades of research and stakeholder input
- Review the framework: go.cms.gov/framework
CMS Framework for Health Equity: 5 Priority Areas

**Priority 1:** Expand the Collection, Reporting, and Analysis of Standardized Data

**Priority 2:** Assess Causes of Disparities Within CMS Programs, and Address Inequities in Policies and Operations to Close Gaps

**Priority 3:** Build Capacity of Health Care Organizations and the Workforce to Reduce Health and Health Care Disparities

**Priority 4:** Advance Language Access, Health Literacy, and the Provision of Culturally Tailored Services

**Priority 5:** Increase All Forms of Accessibility to Health Care Services & Coverage
CMS Framework for Advancing Health Care in Rural, Tribal, and Geographically Isolated Communities

• Builds upon and expands original CMS Rural Health Strategy
• Assists CMS in operationalizing efforts for and across diverse geographies
• Identifies 6 priorities
• Evidence based and community informed
Six Priority Areas

Priority 1: Apply a Community-Informed Geographic Lens to CMS Programs and Policies

Priority 2: Increase Collection and Use of Standardized Data to Improve Health Care for Rural, Tribal, and Geographically Isolated Communities

Priority 3: Strengthen and Support Health Care Professionals in Rural, Tribal, and Geographically Isolated Communities

Priority 4: Optimize Medical and Communication Technology for Rural, Tribal, and Geographically Isolated Communities

Priority 5: Expand Access to Comprehensive Health Care Coverage, Benefits, and Services and Supports for Individuals in Rural, Tribal, and Geographically Isolated Communities

Priority 6: Drive Innovation and Value-Based Care in Rural, Tribal, and Geographically Isolated Communities
Tools & Resources
HHS OMH: National CLAS Standards

The National CLAS Standards are intended to advance health equity, improve quality, and help eliminate health care disparities by establishing a blueprint for health and health care organizations.

• Principal Standard
• Governance, Leadership, and Workforce
• Communication and Language Assistance
• Engagement, Continuous Improvement, and Accountability
CDC: Health Equity Guiding Principles for Inclusive Communication

- Inclusive Communication Principles
- Using a Health Equity Lens
- Key Principles

- Preferred Terms
- Developing Inclusive Communications

Quality Improvement Resources: Addressing Drivers of Disparities

- SDOH and data collection through Z Codes
  - Improving the Collection of SDOH Data with ICD-10-CM Z Codes

- Meeting language needs
  - Improving Care for People with Limited English Proficiency Infographic and Resources

- Addressing accessibility barriers
  - Resources for improving accessibility of facilities, helping patients with disabilities navigate health care services

- Training for health care professionals
  - LGBTQI+ Care
  - Individuals with Disabilities
  - Meeting Language Needs
CMS Health Equity Technical Assistance Program

CMS Health Equity TA program supports quality improvement partners, providers, and other CMS stakeholders by offering:

- Personalized coaching and resources
- Guidance on data collection and analysis
- Assistance to develop a language access plan and disparities impact statement
- Resources on culturally and linguistically tailored care and communication
- Training and resources to help embed health equity in stakeholder’s strategic planning:
  - Guide to Developing a Language Access Plan
  - Guide to Implementing the National CLAS Standards
