

**The Inaugural
RANDALL D. CEBUL KEYNOTE ADDRESS
Introduction**

Kurt Stange, MD, PhD

Director, Center for Community Health Integration
Distinguished University Professor
Dorothy Jones Weatherhead Professor of Medicine
Professor of Family Medicine & Community Health, Population &
Quantitative Health Sciences, Oncology and Sociology
Case Western Reserve University

Keynote Speaker

Radically Rethinking Mental Health

Benjamin F. Miller, PsyD
CEO, Empower at Scale

Keynote

Learning Objectives

Participants will be able to:

1. Outline ways the mental health crisis is getting worse.
2. Discuss three ways we can begin to transform how we address mental health in our communities, state, and nation.
3. Describe various steps they can take to begin to address mental health differently in their own lives.

RADICALLY RETHINKING MENTAL HEALTH

Benjamin F. Miller, PsyD

- Disclosures

I have no actual or potential conflict of interest in relation to this program/presentation.

LEARNING

KNOW THE PROBLEMS

OBJECTIVES

WALK AWAY READY TO TAKE ACTION

- ✓ We are in the middle of an opportunity.
- ✗ Timidity should not be tolerated .
- ✓ We know what to do.

MENTAL HEALTH
TREATMENT
CENTER

ACCESS TO MENTAL HEALTH CARE

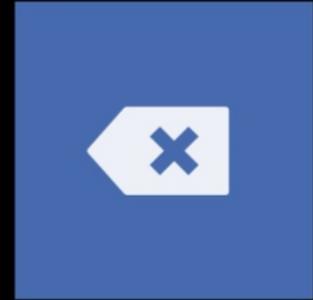

Long waiting times

It can take months to get an appointment with a therapist or psychiatrist

High costs

Many therapists don't take insurance, so you have to pay out of pocket

Workforce shortages

There aren't enough mental health professionals in the places we need them to meet demand

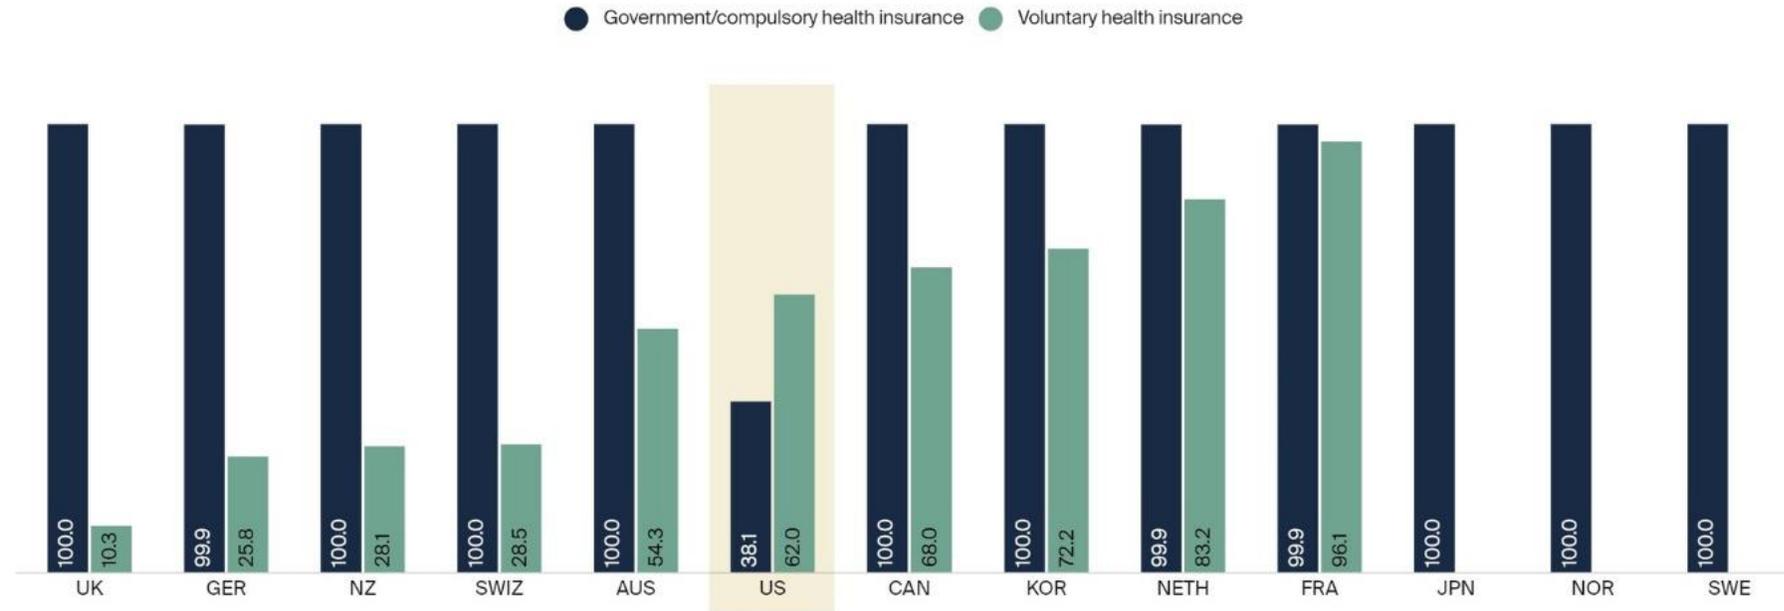

Getting access to mental health care is challenging due to long wait times, high costs, and a shortage of providers.

A LABYRINTH AND A LOTTERY

The U.S. is the only high-income country that does not guarantee health coverage.

Percent of total population with health insurance coverage

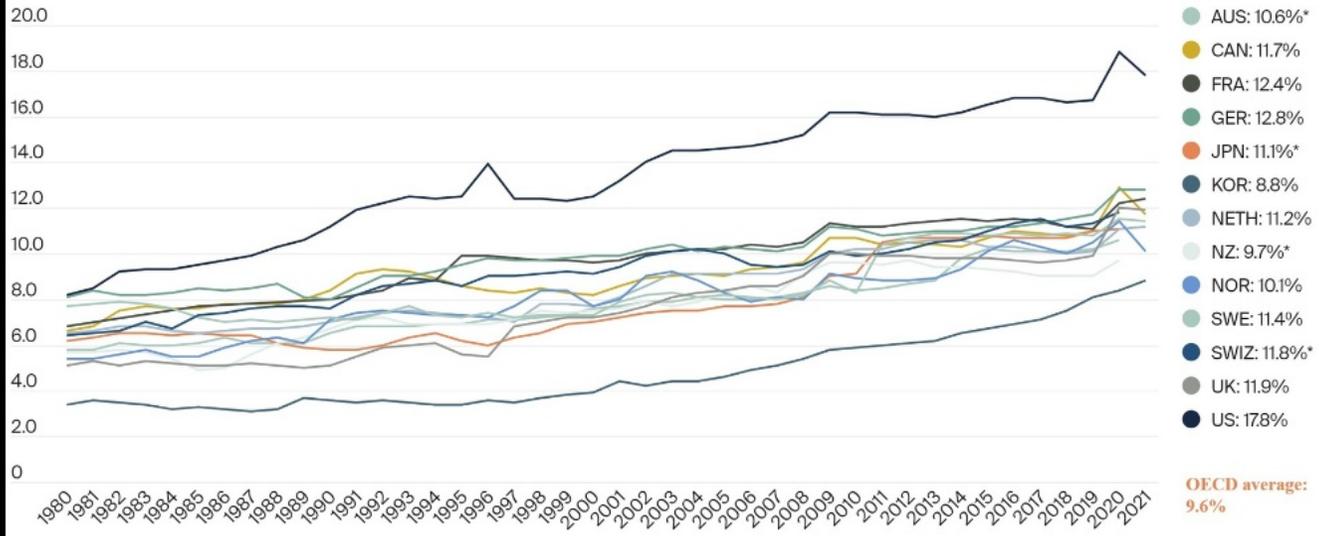

Notes: Government/compulsory health insurance data: 2021 data for AUS, CAN, FRA, NZ, and NOR; 2020 data for GER, KOR, NETH, SWE, SWIZ, UK, and US; 2019 data for JPN. Voluntary health insurance coverage data: 2021 data for AUS, CAN, and NZ; 2020 data for GER, KOR, NETH, and US; 2019 data for UK; 2017 data for FRA and SWIZ. *Government health insurance* refers to public benefit basket covering a minimum set of health services. *Voluntary health insurance* refers to payments for private insurance premiums, which grant coverage for services from private providers. See more information on definitions here: <https://www.oecd.org/health/Spending-on-private-health-insurance-Brief-March-2022.pdf>.

Data: OECD Health Statistics 2022.

Source: Munira Z. Gunja, Evan D. Gumas, and Reginald D. Williams II, *U.S. Health Care from a Global Perspective, 2022: Accelerating Spending, Worsening Outcomes* (Commonwealth Fund, Jan. 2023). <https://doi.org/10.26099/8ejy-yc74>

The U.S. is a world outlier when it comes to health care spending.

Percent of GDP spent on health, 1980–2021*

Download data

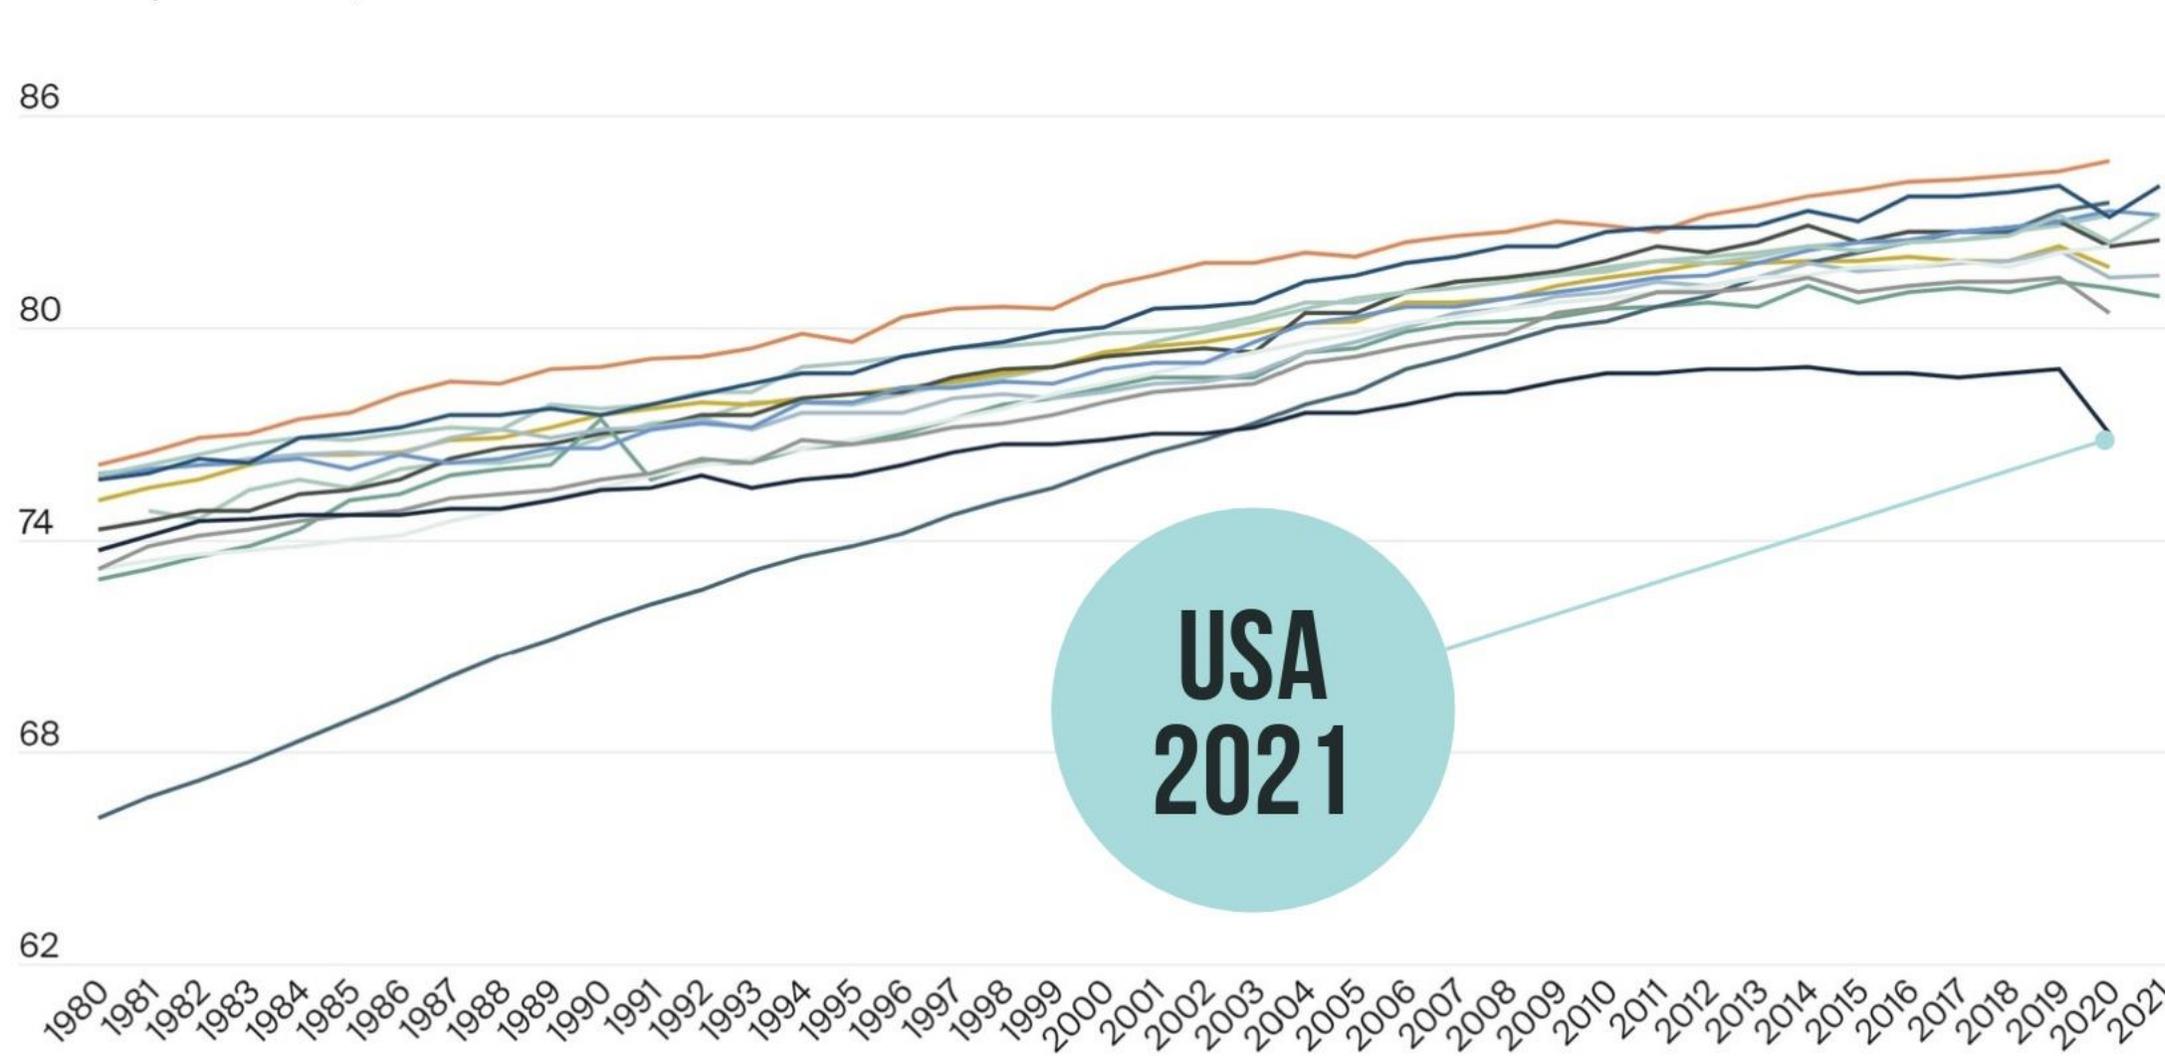

Notes: * 2020 data. Current expenditures on health for all functions by all providers for all financing schemes. Data points reflect share of gross domestic product. Based on System of Health Accounts methodology, with some differences between country methodologies. GDP = gross domestic product. OECD average reflects the average of 38 OECD member countries, including ones not shown here.

Data: OECD Health Statistics 2022.

Source: Munira Z. Gunja, Evan D. Gumas, and Reginald D. Williams II. *U.S. Health Care from a Global Perspective, 2022: Accelerating Spending, Worsening Outcomes* (Commonwealth Fund, Jan. 2023). <https://doi.org/10.26099/8ejy-yc74>

IN 2021, THE U.S. SPENT 17.8 PERCENT OF GROSS DOMESTIC PRODUCT (GDP) ON HEALTH CARE, NEARLY TWICE AS MUCH AS THE AVERAGE OECD COUNTRY.

Years expected to live, 1980-2021*

2021 data (or latest available year)*:

- AUS: 83.2*
- CAN: 81.7*
- FRA: 82.5
- GER: 80.9
- JPN: 84.7*
- KOR: 83.5*
- NETH: 81.5
- NZ: 82.3*
- NOR: 83.2
- SWE: 83.2
- SWIZ: 84.0
- UK: 80.4*
- US: 77.0*

OECD average: 80.4

[Download data](#)

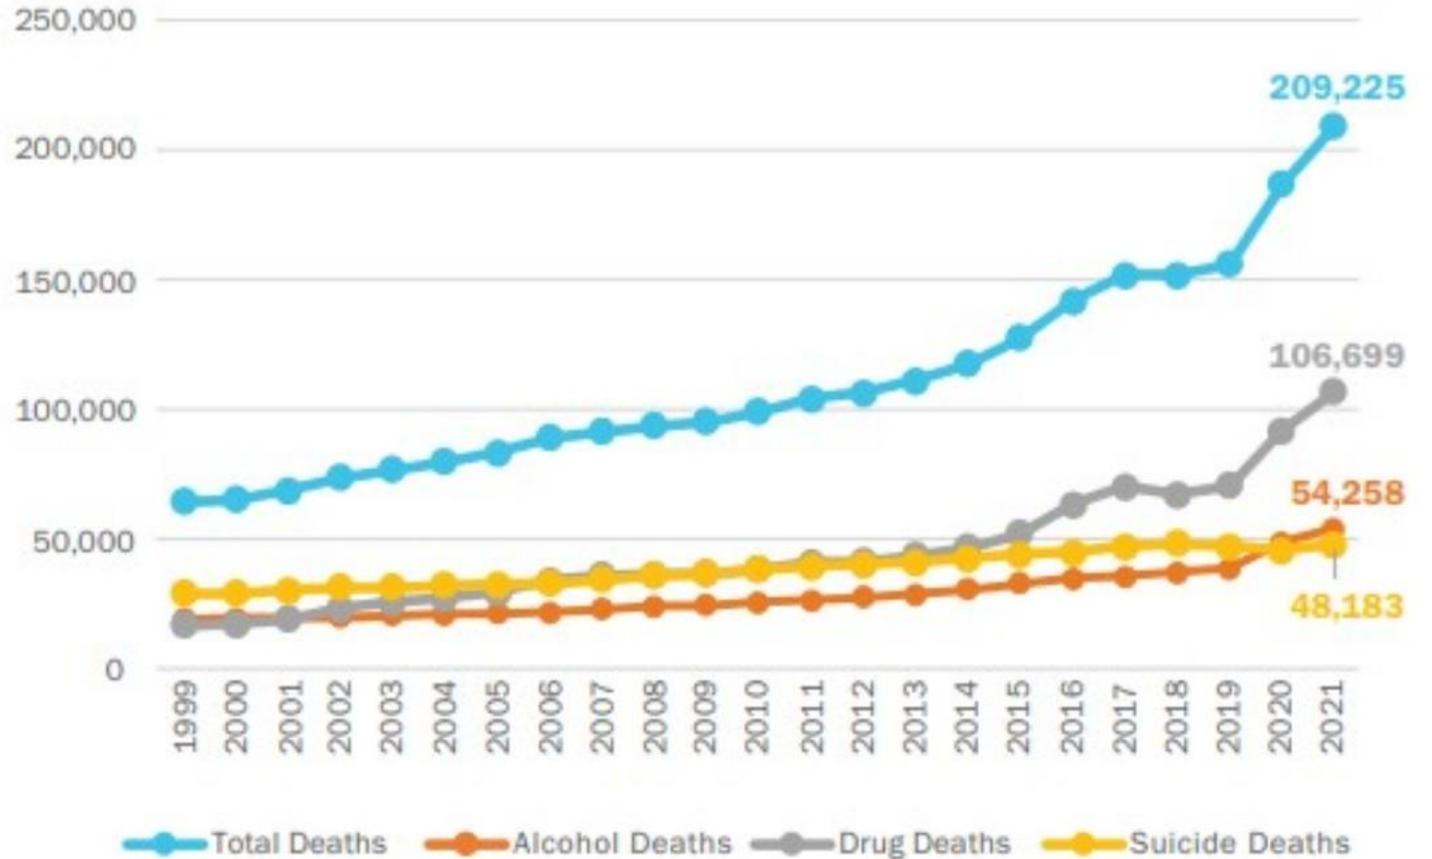

Note: * 2020 data. Total population at birth. OECD average reflects the average of 38 OECD member countries, including ones not shown here. Because of methodological differences, JPN and UK data points are estimates.

PAIN IN THE NATION

DEATHS OF DESPAIR

Between 2011 and 2021, annual deaths have more than doubled—rising from an already startling figure of 104,379 deaths in 2011 to a staggering 209,225 deaths in 2021.

COMPLEXITY OF US HEALTH CARE SYSTEM

Comparison of various metrics to measure complexity

5 HARSH REALITIES WE MUST FACE

REALITY CHECK

THE BIG 5

Health care is a business

The U.S. health care system is largely driven by profit motives, which can lead to higher costs and disparities in access.

Health is mostly not about health care

A broader spectrum of factors, including social determinants, lifestyle choices, and community well-being play a much larger role.

The medical model is insufficient

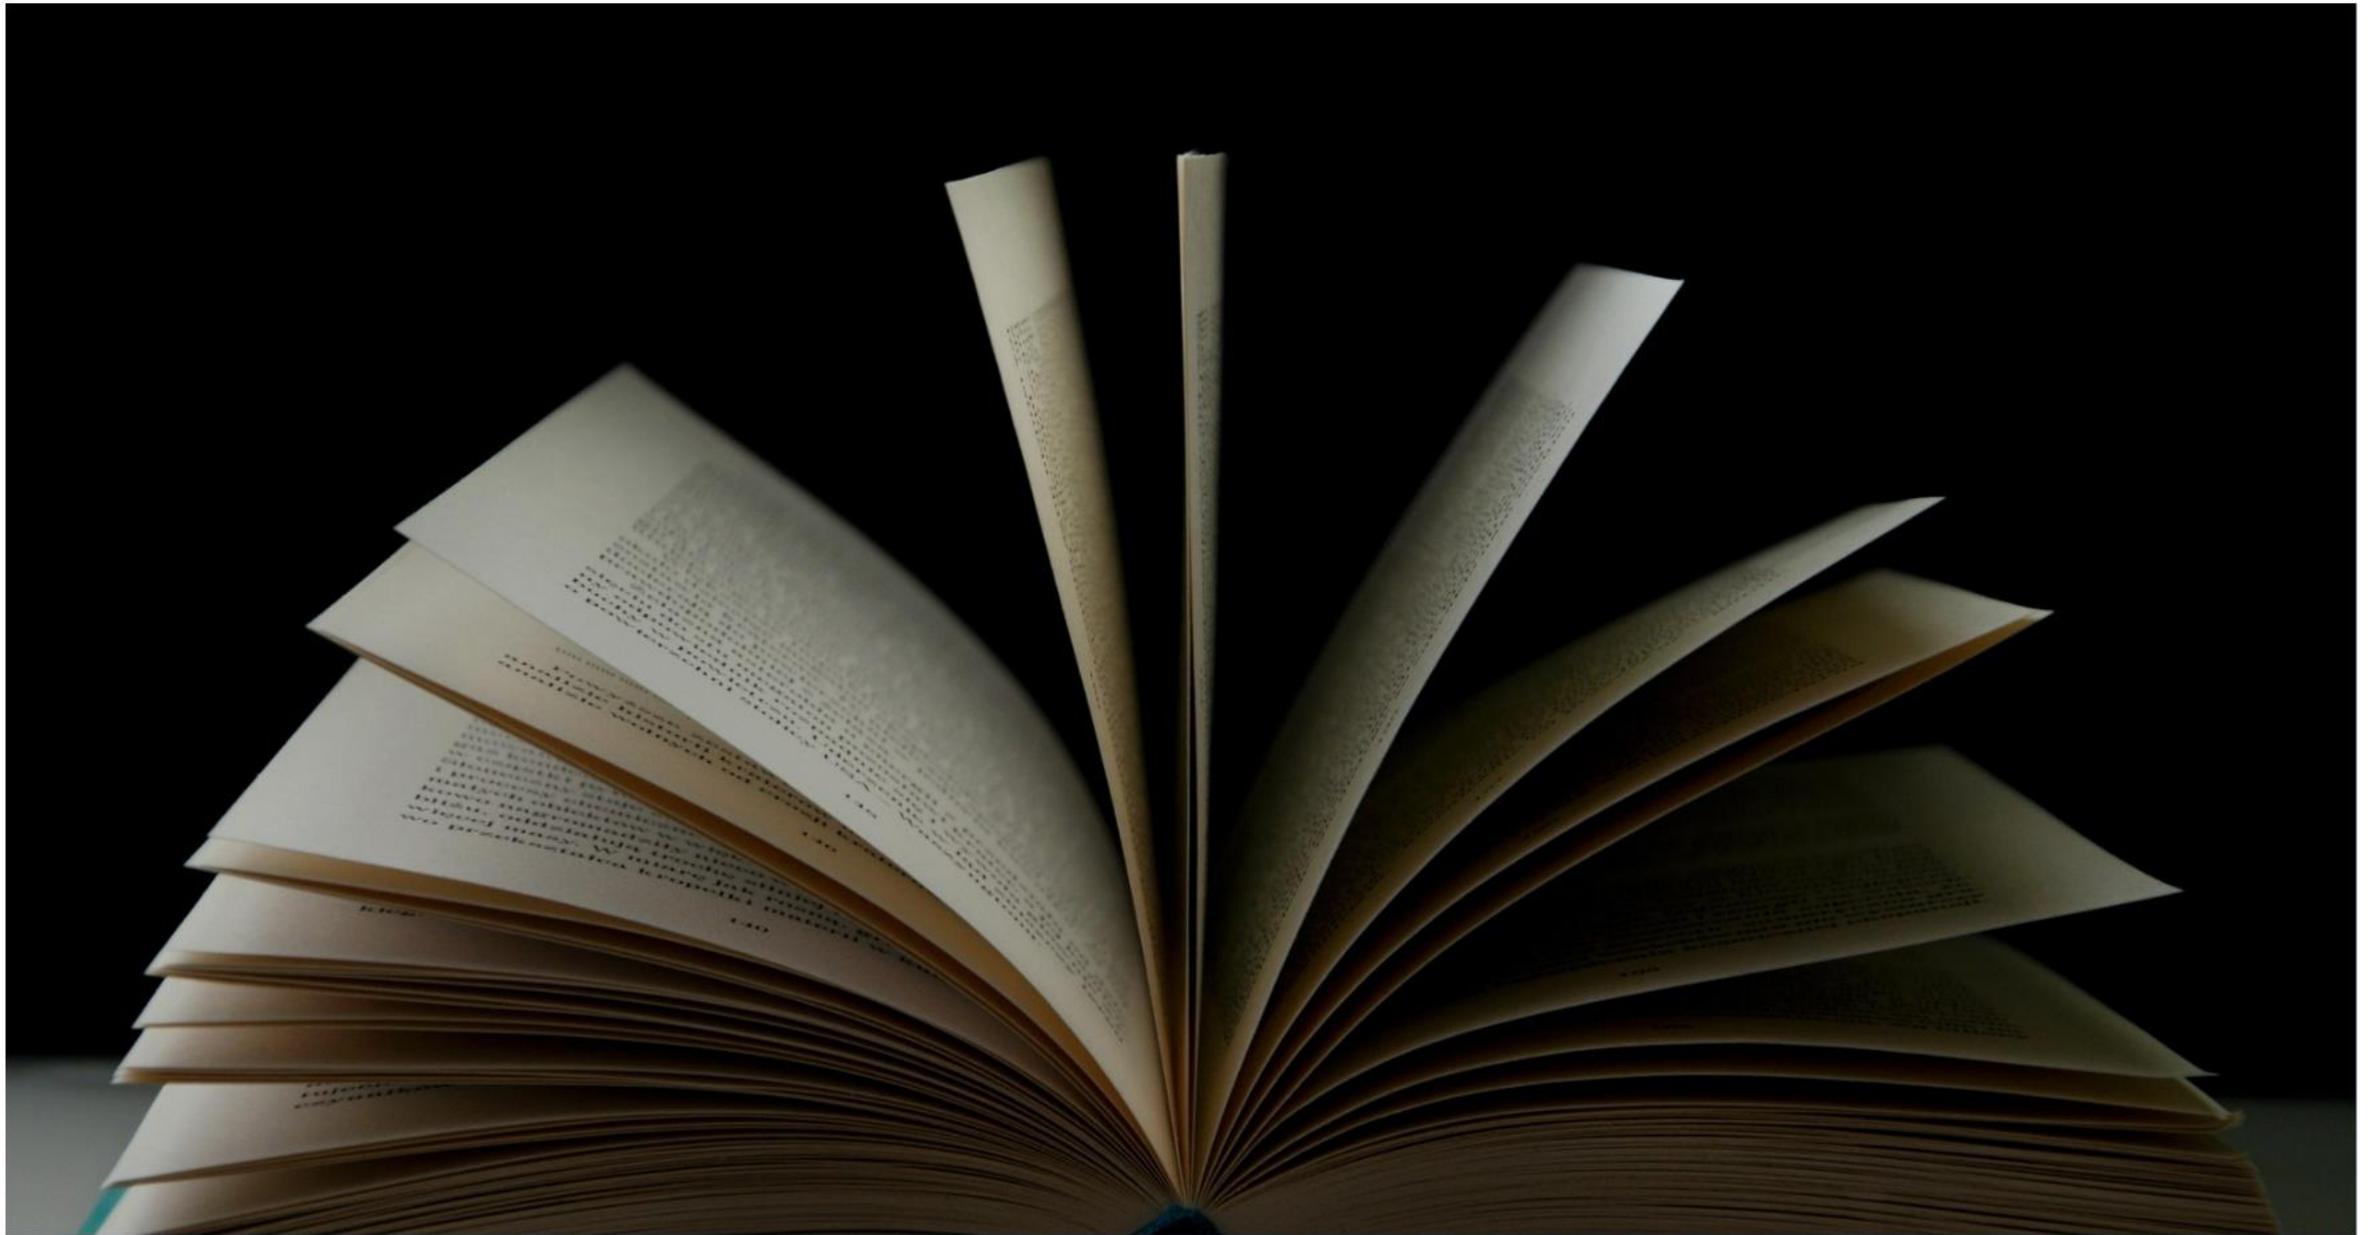

Health can't be addressed one disease at a time; diagnosing and treating is necessary but insufficient.

You can't treat people outside of the context of community

Place matters more than we give it credit for.

Our structures are flawed and reinforce a reductionist view of health

Policy codifies this all leading us to invest over and over in systems that don't work.

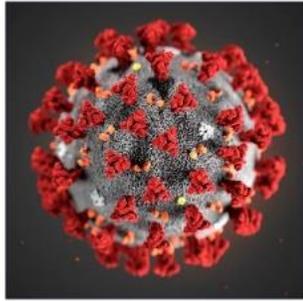

IMAGINE

A loved one calls you on the phone saying they need help. What do you say?

THIS IS OUR MOMENT

THE BACKDROP

COVID

The COVID-19 pandemic has put mental health in the spotlight and revealed significant gaps in care.

Celebrities

High profile celebrities openly discussing their mental health is reducing stigma.

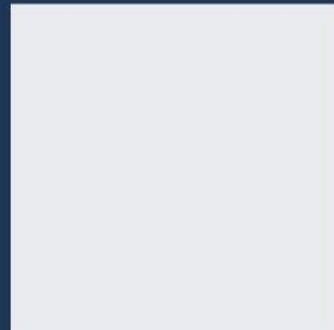

Culture

A cultural shift towards prioritizing mental health, led by our youth, is creating more openness and acceptance.

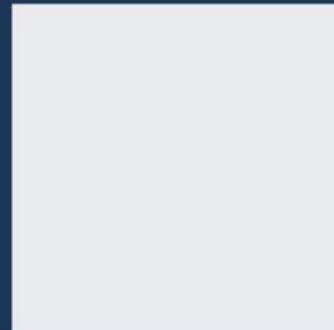

There is growing momentum and opportunity to take bold action to improve mental health access and quality.

IT'S TIME TO INNOVATE

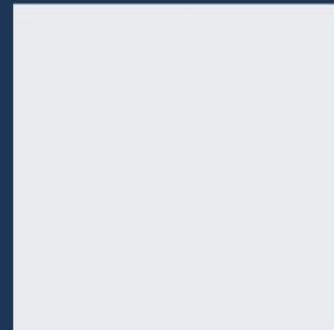

Getting back to our basics on health

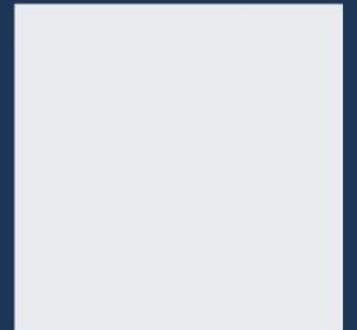

DAYS

HOURS

MINUTES

SECONDS

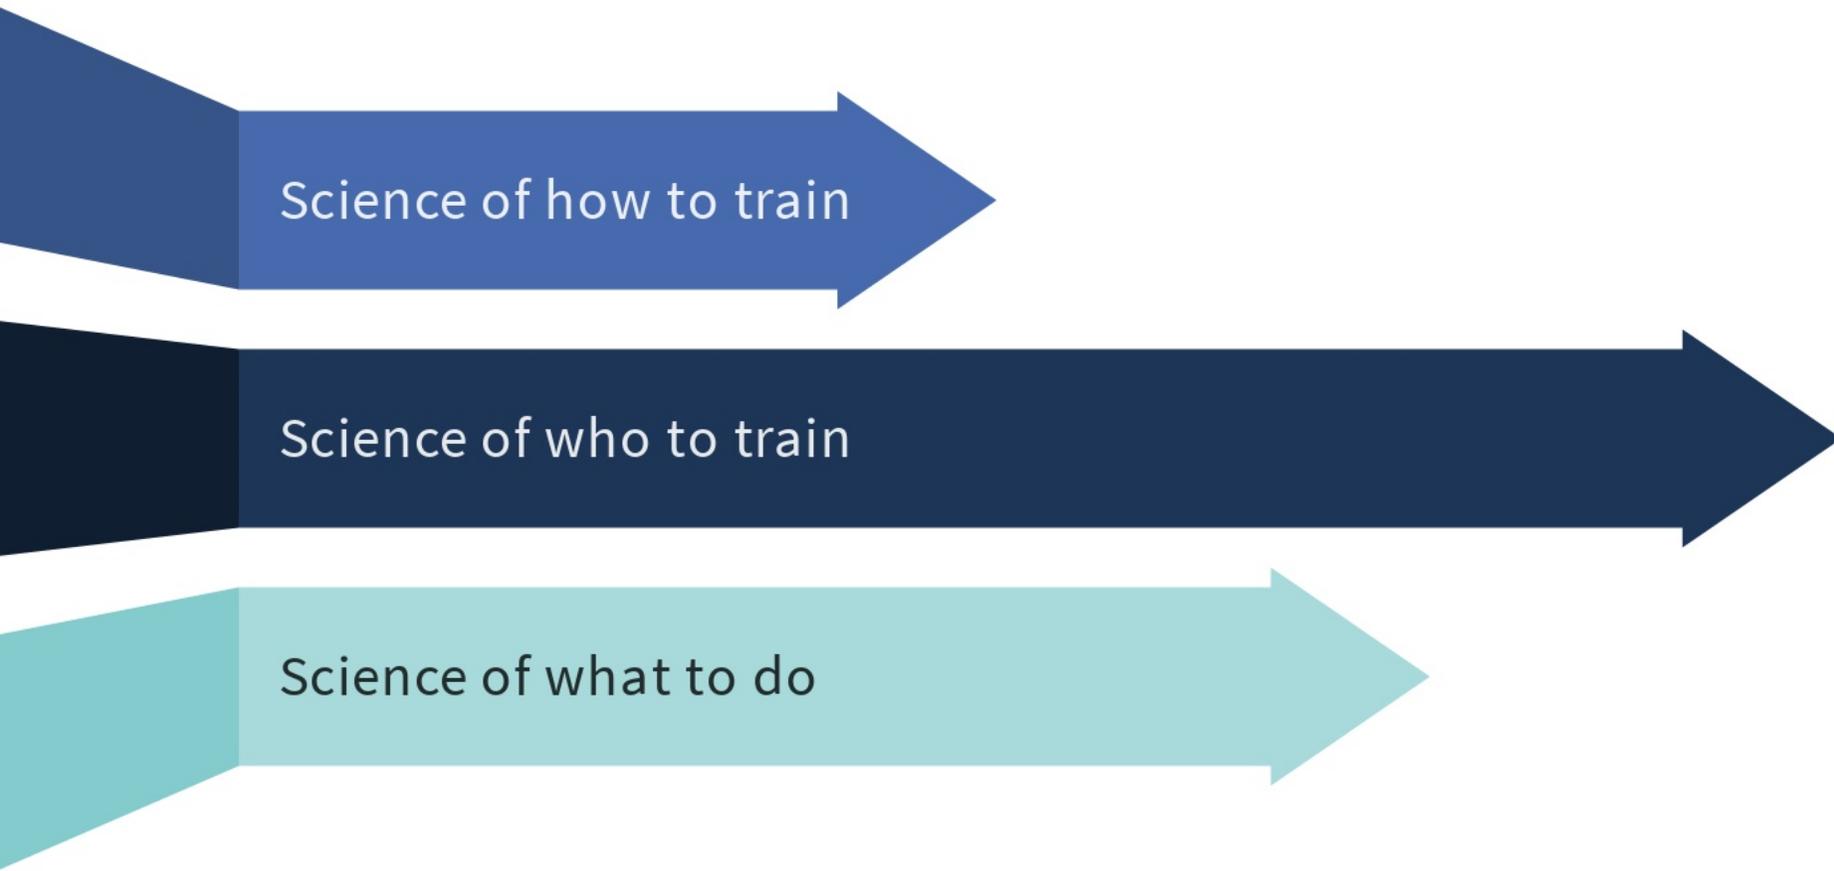

FIVE CONSIDERATIONS

LET'S GO FROM AWARENESS TO ACTION

#1 LET'S RECONSIDER WHO

Population health vs. Individual health

Science of how to train

Science of who to train

Science of what to do

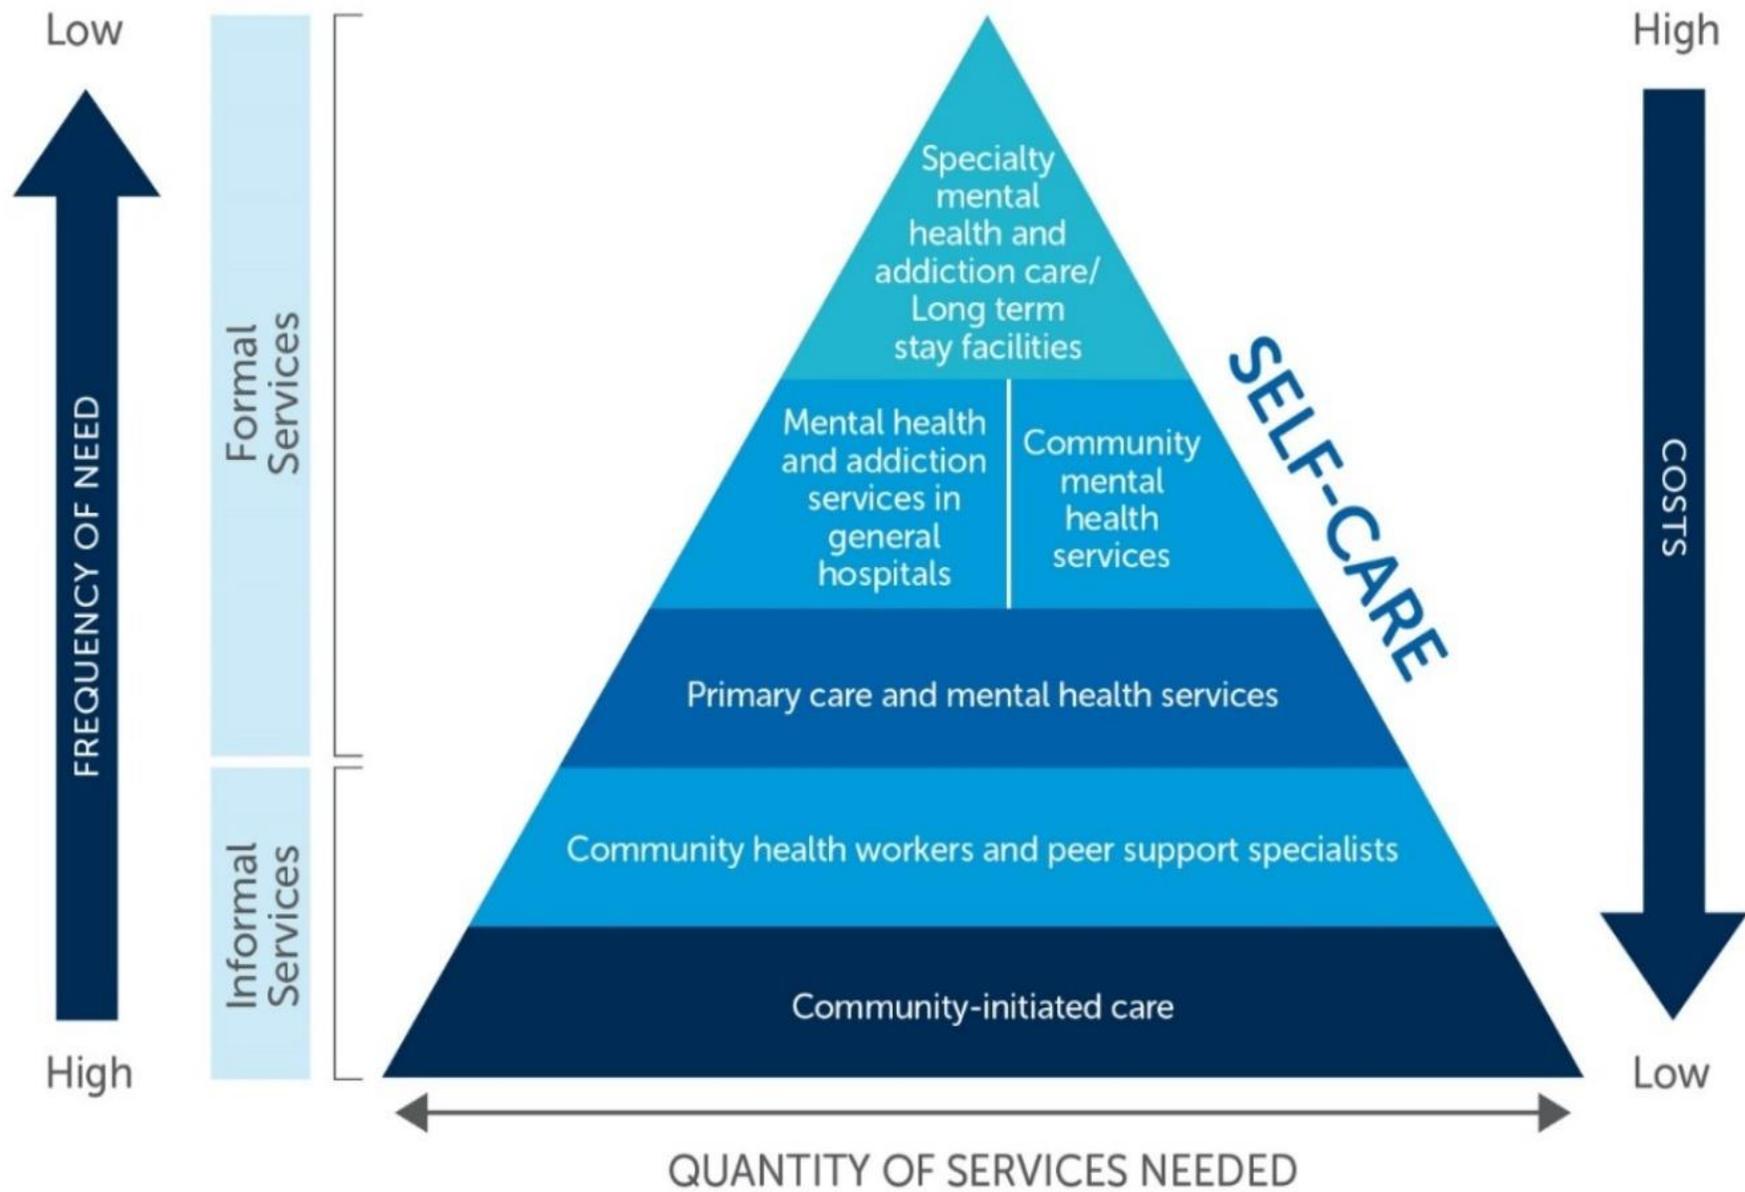

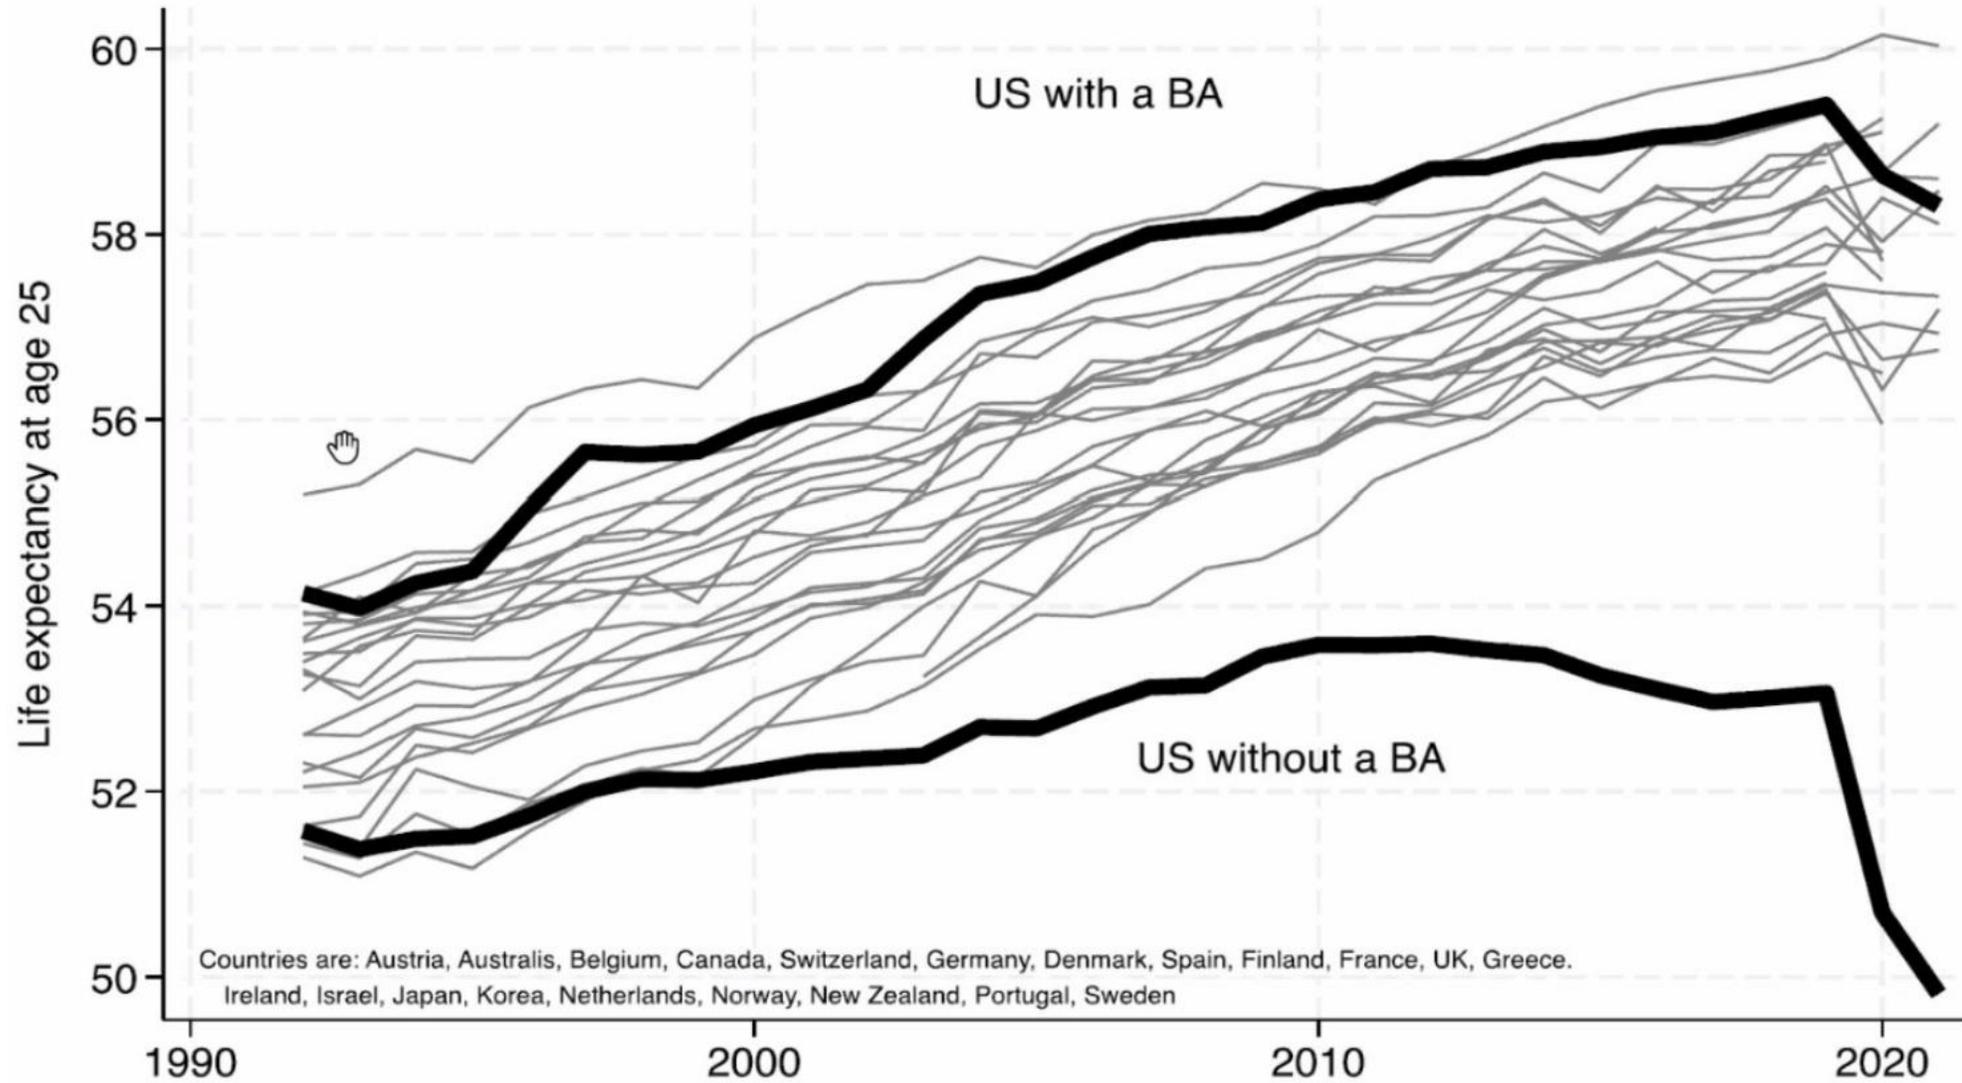

Figure 1: Framework for Mental Health and Addiction Workforce (Revised from WHO) World Health Organization. (2009). Improving health systems and services for mental health (978 92 4 159877 4). WHO Press. https://www.who.int/mental_health/policy/services/mhsystems/en/

#2 LET'S RECONSIDER WHERE

ADULT LIFE EXPECTANCY: US AND 22 OTHER RICH COUNTRIES

- **Faster**
We're 10x faster than our competitors
- **Smarter**
And 10x smarter
- **Better**
Making us 10x better

BENCH PRESS

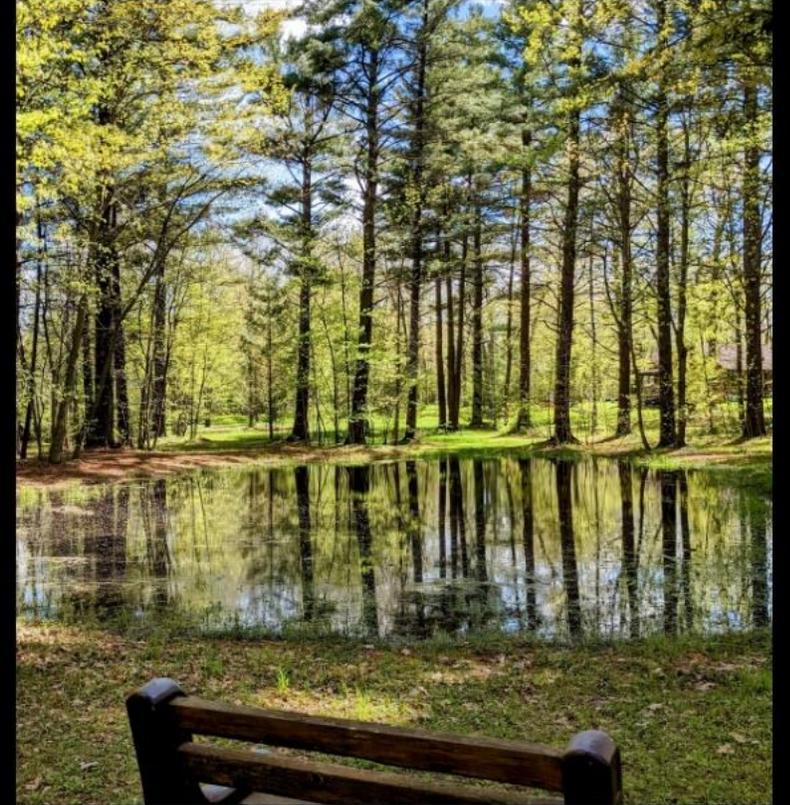

Open opportunity

Sometimes people are just looking for someone to talk to.

With friends

Take advantage of the intimate moments.

Contemplative

Equip people and places with resources.

#3 LET'S RECONSIDER WHAT

Simplifying the complex

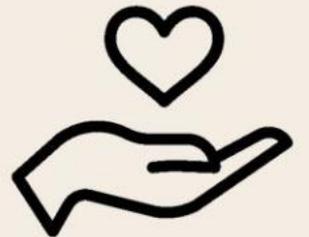

Care in community, by community, and for **community**

Community Initiated Care (CIC) hypothesis: better equipping trusted community agents* with skills to help can change the trajectory of a person's mental health journey.

- More immediately address mental health needs
- Reduce overall demand on the clinical enterprise
- Complement traditional care that may be given
- Positively impact outcomes at both a micro and macro level

This means the field needs to develop strategies that, with an asset-based respectful approach, equips community residents and organizations with the skills and resources to be their own first response.

Health

Mental health 'first aid' training has no clear medical benefit

A review of the Mental Health First Aid programme, which trains members of the public to support people with conditions like depression, has found no good evidence of it actually improving mental health

A glowing laptop is shown from a low angle, with a bright blue light trail extending from the top left and a red light trail extending from the bottom right. The laptop is illuminated with a soft blue and red glow, and the text is overlaid on the screen area.

#4 LET'S RECONSIDER HOW

A long-exposure photograph of a highway at night, showing light trails from cars. The text '#5 LET'S RECONSIDER OUR FOCUS' is overlaid in the center.

#5 LET'S RECONSIDER OUR FOCUS

THE BIG THREE

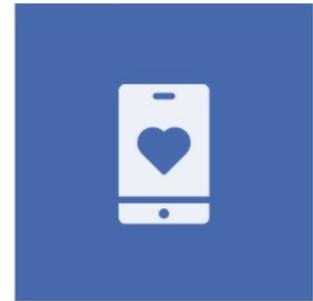

Care

Improving access to care through robust integration

Coverage

Expanding access to affordable insurance coverage

Community

Investing in community resources and support systems for better health outcomes

Focusing policy efforts on care, coverage, and community will lead to an affordable, accessible health care system.

HOMELESS

Once we realize that something is not working, it is unethical to proceed as if it is.
